Environmental Policy

Babcock will strive to achieve and maintain the highest standards in all environmental matters. We recognise the value of the environment and will seek to minimise or eliminate any adverse impact. An appropriate standard will wherever, within Babcock, be maintained by each operation.

It is the responsibility of Sectors and Direct Reports to develop and maintain detailed environmental protection policy, procedures and processes appropriate to their specific business. Such a policy should be formalised and approved at all sites on which the business is present. The policy should be reviewed in the light of operational or other changes necessary to ensure compliance.

Sector Chief Executives and Heads of Direct Reports should ensure that sufficient and appropriate expertise is available to advise on the most effective methods of controlling the environmental impact of Babcock operations.

David Lockwood
Chief Executive
Babcock International Group PLC October 2020
