

Creating a safe and secure world, together

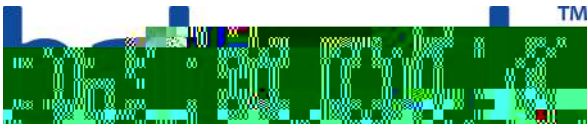

CASE STUDY

COMPLETE FLYING TRAINING SYSTEM FOR AIR 21

At a glance

- › Partnered with Dassault Aviation
- › 11-year contract
- › Provision of 17 Pilatus PC-21 aircraft, three Part Task Trainers (PTT) and two Full Mission Simulators (FMS)
- › Delivering 11,000 flight and 6,500 simulator training hours per year
- › Supporting up to four sorties of 14 aircraft per day, plus a demanding night flying programme

A world-class programme that provides a complete system to the French Air Force (FAF), delivering flying training to upcoming jet pilots and weapons systems officers.

Creating a safe and secure world, together

Together with our partner, Dassault Aviation, Babcock provides a modern training system to the French Air Force (FAF), combining state-of-the-art simulation environments with in-air training.

This world-class programme prepares upcoming jet pilots and weapons systems officers for today's increasingly sophisticated aircraft, using revolutionary technology to deliver military aviators while reducing overall training time and costs.

This programme is an important step in the FAF's plan to modernize the fighter crews' training syllabus, through the renewal of both
